Incident Response SOP — Section 3.1: Severity Classification

Normal incident resolution time: 0-4 hours from the time an incident is first reported.

If resolution time exceeds 4 hours:

- Classify as MEDIUM severity
- Notify the department lead within 24 hours
- Escalate to the executive team only if resolution time exceeds 12 hours (HIGH severity, immediate executive notification required)

If the incident involved customer or data impact, alongside a resolution-time exceedance, increase the severity classification by one level.
